

# **12V to 220V inverter that can be directly connected to a home**

## Overview

---

What is a 12V inverter?

A 12V inverter is an electronic device that converts 12V DC power into 220V AC power. This type of inverter is typically used to convert automotive or other 12V DC power sources into standard household or industrial power to power a variety of devices. inverter.com provides inverters from 300w to 3000w.

What are the advantages of a 12V to 220V inverter?

Sufficient power: When the rated load power equal to or less than inverter power, the inverter will not produce overload protection and can go on working. Good safety performance: The 12v to 220v inverter features in short-circuit, overload, overvoltage, under-voltage, over-temperature protections.

How does a home power inverter work?

The home power inverter directly take 12V DC power supply from a DC power source (such as: storage batteries, etc.), with a special clamp connected to the inverter into AC 220V, to supply electrical products. You can size the rated power electrical products to select a matched power inverter.

How to choose a matched power inverter?

You can size the rated power electrical products to select a matched power inverter. But pay attention to the use of electrical appliances rated power less than or equal to the inverter rated power.

What is a 1000 watt 12V power inverter?

1000 watt 12V power inverter for sale, input voltage DC 12V, continuous power 1000W and unload current less than 0.8A. Comes with a USB port, and the 12V to 110V inverters' max efficiency reaches 90%, works at (-10°C, 50°C), and stores at (-30°C, 70°C). Modified sine inverter is compatible with air conditioners, washing machines, ovens, and so on.

What types of inverters are available?

We offer a variety of specifications and models of inverters to meet your power needs, whether for home, automotive, or travel purposes. The Leaptrend Sirius series 3000W 12V Pure Sine Wave Inverter is perfect for most off-grid systems, whether for a van, RVs, trucks, boats, yachts, coffee van inverter or any remote location needing power.

## 12V to 220V inverter that can be directly connected to a home
