

660 base station power supply

Overview

Is the Duracell PowerSource 660 a good power station?

The Duracell PowerSource 660 gasless portable power station has many people looking at it to see if it is something they should buy. There are some reviews out there that say it is the best power station/solar generator to have come out in a long time. Many say in their reviews that “it’s great for the price.” But what do you get for the price?

.

How much does a PowerSource 660 cost?

To be 100% fair, the PowerSource 660 is only \$699 which means regardless of what you get for that price, it’s a cheap price in the world of solar generators and power stations. The Titan is \$2,995 which is much higher than the PowerSource 660.

Can a PowerSource 660 be charged in a day?

Not only does the PowerSource 660 have older technology using a PWM charge controller, but it can only let in 89w at a time which means it cannot be charged in a single day. Not to mention, that in a true blackout scenario, we need to be running a fridge while charging.

How many cycles does a Duracell Power Source 660 last?

The Duracell PowerSource 660 has only 250 cycles. And it will only hold a charge for up to three months. To put that into perspective, the average smaller solar generator that uses Lithium-Ion can 500 cycles and can hold a charge for up to a year. That is why the number 1 recommended power station is the Titan solar generator.

660 base station power supply

Ion+ 660W Platinum -- Fractal Design

Ion+ is available now in 560, 660, 760 and 860 watt capacities, all with 80 PLUS® Platinum Efficiency, 10-year warranty, and a full electrical protection suite for your peace of mind.
