

Affordable solar temperature control system

Overview

What is a solar thermal controller?

The solar thermal controller is a critical component of any solar system, large or small - selecting the right solar controller will help you get the most out of your system for decades to come. Solar Panels Plus features the line of iSolar controllers.

Which iSolar controller is best for solar thermal systems?

Solar Panels Plus features the line of iSolar controllers. The iSolar series is manufactured specifically for solar thermal applications, and has a variety of options, add-ons, and customizable features. The SPP iSolar 2 is a solar controller for solar thermal systems.

How many temperature sensors does a solar controller have?

Up to 4 Temperature Sensor Inputs: This solar controller allows up to 4 temperature inputs, allowing you to view the temperature of the solar array, the solar tank, as well as other points throughout the system. **Energy Metering:** Integrated energy metering tells you exactly what your system is producing, and the effectiveness of your solar array.

What is a temperature controller used for?

The controller can be used in greenhouses to regulate the temperature of the air and soil. The controller measures the temperature of the air and soil and adjusts the ventilation and heating systems to maintain a consistent temperature. 4. The controller can also be used in solar cooling systems, such as absorption chillers.

What is a solar controller?

The solar controllers offered by Solar Panels Plus features a full line of customizable options and features, ranging from multiple sensor inputs, remote monitoring, relay controls, and much more.

What is the Isolar BX solar controller used for?

The iSolar BX solar controller can be used to control your solar hot water or solar space heating systems, or can be customized to control any number of other solar related applications. This solar controller features 4 relay control outputs, as well as two PWM outputs for high efficiency DC pumps.

Affordable solar temperature control system
