

Asia Communications 2025 5G Base Station Construction Plan

Overview

How many 5G base stations will China build in 2025?

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support industries expected to shape the next decade, the country's Ministry of Industry and Information Technology (MIIT) announced during its annual work conference.

Will China achieve a 5G breakthrough by 2025?

Wang Zhiqin, deputy head of the China Academy of Information and Communications Technology, a government think tank, said China is likely to achieve several breakthroughs in 5G technological evolution, network construction and applications by 2025.

How many 5G base stations are there in India?

Citing that the country has built a staggering 4.19 million 5G base stations, the industry regulator said that "promoting 5G revolution and 6G innovation will be one of the priorities" next year.

How big will the information and communication industry be in 2025?

The five-year plan also forecast that by the end of 2025, the information and communication industry will maintain an annual growth rate of about 10 percent to reach a total revenue of 4.3 trillion yuan (\$674.2 billion) in 2025.

Who checks a 5G base station in Xiangyang?
