

Australian double-glass photovoltaic module models and specifications

Overview

What is a diamond dual glass biface solar panel?

The Diamond Dual Glass BiFacial Solar Panel is the result of manufacturing for harsh Australian conditions for over 10 years. This innovative panel is built tough, has more warranted power and takes advantage of BiFacial technology to give you more solar savings.

How does a diamond dual glass solar panel work?

The Diamond Dual Glass also has Bifacial Technology which means it can absorb power from both sides of the panel. In optimal install conditions like tilt frames, up to 25% more power yield can be gained. The Diamond Dual Glass solar panel can absorb power from both sides of the panel.

Why should you choose a diamond dual glass solar panel?

Our solar modules are designed to deliver uncompromising functional reliability even in the most challenging Australian environmental conditions. The Diamond Dual Glass also has Bifacial Technology which means it can absorb power from both sides of the panel. In optimal install conditions like tilt frames, up to 25% more power yield can be gained.
