

Average price of solar panels

Overview

How much do solar panels cost on average?

As of 2025, the average cost of residential solar panels in the U.S. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 to \$3.50 per watt of installed capacity (more on price per watt below). How much do solar panels cost?

In addition, the specifications of the panels (such as power) and the cost of installation also play a role. On average, you pay around €500 to €600 per solar panel, including installation. The cost of solar panels depends on the number of panels and the power per panel. In general, the more panels you buy, the cheaper the price per panel becomes.

How much does a home solar system cost?

How much will a home solar system cost?

In 2024, you'll pay about \$22,022 to install an 11 kW solar panel system, which is what EnergySage estimates the average U.S. solar shopper needs, after federal tax credits. Due to the high number of variables, though, the end cost of your system can vary widely.

How much do solar panels cost in 2024?

But in 2024 the average cost of installing a solar panel system is \$22,022, according to EnergySage, a solar marketplace with funding from the U.S. Department of Energy. In other words, solar panels are not cheap, which means you could be looking at a hefty bill if you need to pay off the balance all at once at closing.
