# Base Station Communication Emergency Plan

Overview

How do emergency response groups communicate?

Instead, each CERT and jurisdictional office of emergency management has its own protocols for how emergency response groups coordinate communication. This is called a communications plan, and it defines who talks to whom.

What is emergency communications?

Emergency communications is a system of coordinating people and transmitting information to first responders during an emergency. Emergency communications includes: Describe the importance of communications in emergency response. Describe the role of CERT in communications during an activation. Describe how to use a communications plan.

What should be included in an emergency response plan?

It should address sourcing for primary and backup systems, the people that will operate the equipment, and detail the communications requirements for emergency response organizations. Organization and Assignment of Responsibilities This section describes the specific communications responsibilities that are assigned to the tasked organizations.

What is a base station Radio?

Base station radios are located in fixed positions, such as public safety answering points or dispatch centers, and tend to have the most powerful transmitters. A network is required to connect the different base stations to the same communications system.

How do CERT volunteers communicate with other emergency response agencies?

CERT volunteers act as the "eyes and ears" for other emergency response agencies by communicating through the ICS. A communications plan defines

how different levels communicate during an emergency response situation. Different communications modes have different advantages and limitations during an activation.

Do emergency communications systems need to be activated?

Situation and Assumptions The Situation portion of this section identifies some broad considerations that apply to the kinds of emergency conditions that could occur and would require the activation of emergency communications systems to support the jurisdiction's response to the situation.
