

Base station Huawei power cabinet model

Overview

How much power does a Huawei base station use?

APM30+ RFC +TMC+BB,DRFU (S444)/ GRFU (S121212): 4-hour standby (184Ah) Description: The power consumption of the transmission cabinet is less than 200W. Huawei's fourth-generation base station includes: indoor macro base station BTS3900, outdoor macro base station BTS3900A, distributed base station DBS3900.

Does Huawei provide a macro & distributed base station?

Huawei also provides the macro + distributed base station and the Cloud BB solution. are located in the same cabinet. This solution enables flexible networking, which is more adaptive and provides stronger capability of capacity expansion and evolution. For + Distributed Base Station. be coordinated.

How many RF modules are in a base station cabinet?

The base station cabinet contains as many as six RF modules. These multicarrier modules support both Huawei's GSM-R 5.0 and the company's enterprise LTE (eLTE). Use of this multi-radio base station (and similar indoor base stations) maximizes versatility while minimizing site deployment costs.

What is a bts3900a RF base station?

One of the most compact outdoor macro base stations in the industry, the BTS3900A features a large, scalable capacity and multi-mode applications that meet the requirements of long-distance railways. The base station cabinet contains as many as six RF modules.

What is dbs3900 dual-mode base station?

DBS3900 Dual-Mode Base Station is the fourth generation base station developed by Huawei. It features a multi-mode modular design and supports three working modes: GSM mode, GSM+UMTS dual mode, and UMTS mode

through configuration of different software. In addition, the DBS3900 supports smooth evolution to the Long-Term Evolution (LTE).

What is a bbu3900 base station?

The 3900 series base stations allow a macro base station and a distributed base station to be deployed at the same site. In this scenario, the RFUs and RRUs are connected to the same BBU3900. This deployment provides flexible networking of base stations, enabling further capacity expansion and evolution in the future. BBU.
