

Belgian emergency energy storage vehicle price comparison

Overview

Why is Belgium's storage fleet growing so fast?

Belgium's storage fleet is growing at a fast pace, not the least due to the opportunity to secure contracted revenues via its CRM auctions. On the last day of October, system operator Elia published the results of the CRM auctions held this year, showing that a total of 450 MW of BESS had secured contracts.

How did the energy crisis affect Belgian nuclear power?

"In 2022, the energy crisis led to a partial reversal of the Belgian nuclear phase-out. The lifetimes of the nuclear reactors of Doel 4 and Tihange 3, with a total capacity of 2.1 GW, were extended until 2035. This reduced the need for additional capacity in the Belgian power system.

Why is Belgium a good place to invest in a battery?

Other factors that make Belgium an appealing location for battery investments are the exemption of TSO grid fees and high revenues from balancing market (mainly FCR and aFRR)," Simon De Clercq, senior research associate at Aurora Energy Research, told ESS News.
