

# Belgian energy storage new energy short

## Overview

---

Kallo, 14 May 2025 – NHOA Energy, the global provider of utility-scale energy storage systems, today celebrated with ENGIE the groundbreaking of a 400 MWh battery energy storage system (BESS) in Kallo, Beveren, Belgium. What does the new funding mean for battery storage in Belgium?

This new funding will be used to accelerate operations in Belgium, make further investments in battery storage at customer sites, and fulfill both its Belgian and European ambitions as part of the energy transition.

Is TotalEnergies developing a second battery storage project in Belgium?

Download the Press Release (PDF) Antwerp, April 3, 2024 – On the occasion of Belgian Energy Minister Tinne Van der Straeten's visit to TotalEnergies' Antwerp refinery battery storage project, the Company announced the development in Belgium of a second similar project. The new project will be developed on the site of TotalEnergies' depot in Feluy.

What is Giga storage Belgium?

GIGA Storage Belgium develops and deploys large-scale energy storage projects within the Belgian energy network. The facility will provide stored renewable energy during periods of low solar and wind energy production, reducing Belgium's reliance on gas power plants.

How much power will Belgium's new solar park have?

The completed park will have a power capacity of 700 MW and a storage capacity of 2,800 MWh, enough to power 385,000 households for a year, according to Sweco. The facility will provide stored renewable energy during periods of low solar and wind energy production, reducing Belgium's reliance on gas power plants.

Can a new renewable manage a gigawatt hour of storage capacity in Belgium?

"Our ambition is to manage one gigawatt hour of storage capacity in Belgium

by 2030, equivalent to the capacity of two gas power plants,” said Christophe Degrez, CEO and co-founder of Bnewable. “Smart control allows us to aggregate the energy generated via battery systems at our customers’ premises.

When will totalenergies start-up in Belgium?

Start-up is expected at the end of 2025. These two projects, which represent a global investment of nearly €70 million, will bring TotalEnergies' storage capacity in Belgium to 50 MW / 150 MWh. These battery storage sites play a key role in the resilience of the electricity system, providing flexibility and helping solve grid congestion problems.
