

# **Botswana Huijue solar power generation home effect**

## Overview

---

Does Botswana have a commitment to solar energy?

The commitment to solar energy is evident in the policies and frameworks that support the development of renewable projects. By integrating solar power into the national energy strategy, Botswana aims to foster a more resilient and sustainable energy future.

Will a 100 MW solar plant be built in Botswana?

State-owned Botswana Power Corp. has signed a power purchase agreement with a consortium of Chinese enterprises and other companies to construct a 100 MW solar plant in southern Botswana. The project is expected to start generation by the end of 2025.

Where is the largest solar project in Botswana?

“As we reach another milestone in our renewable energy journey in Botswana, we are now looking forward to starting construction of the largest solar project in the country,” said Scatec CEO Terje Pilskog. The plant will be located near Mmadinare, close to the former mining town of Selebi-Phikwe, 400 kilometres north-east of the capital Gaborone.

Do we need more pilot solar projects in Botswana?

According to literature, there are already a few pilot solar energy projects such as the University of Botswana – Mokolodi Solar Project and Phakalane Solar Project (Baek, Jung & Kang, 2019). Authors of this current study suggest that a few more pilot projects are needed in Botswana to supplement current projects.

How much solar energy does Botswana have?

With over 3,200 hours of sunshine per year, the country boasts an average insolation of 21 Megajoules per square meter on flat surfaces. This exceptional level of solar irradiance positions Botswana among the top countries in the

world for solar energy potential, creating a unique opportunity for the nation to harness this renewable resource.

When will Botswana start generating electricity?

The facility is expected to start generation by the end of 2025. Botswana 's President, Mokgweetsi Masisi, said the project is a key milestone in the country's energy transition. "Our journey toward energy security and transition has begun in earnest and is unstoppable.
