

Can I bring an outdoor power bank to Tuvalu

Overview

Can you put a power bank in a bag?

Avoid using a power bank inside a bag as it can overheat. Power banks are treated the same way by most airlines because the rules come from safety bodies like IATA (International Air Transport Association) and the FAA (Federal Aviation Administration). The good news is that the important points are pretty straightforward.

What is a power bank on a plane?

Skip down to the airline rules and tips for safe travels if you already know your power bank terminology, or read on for a quick recap on power bank basics. At its simplest, a power bank is a rechargeable battery, usually lithium-ion, inside a protective case with electronics that manage safe charging.

Are power banks safe?

Power banks are treated the same way by most airlines because the rules come from safety bodies like IATA (International Air Transport Association) and the FAA (Federal Aviation Administration). The good news is that the important points are pretty straightforward. You must keep power banks in your carry-on cabin bag.

What should you not do with a power bank?

Avoid exposing your power bank to extreme heat or cold (like leaving it in a car), as this can shorten its lifespan or damage it. Don't buy a dodgy or unknown brand power bank. Don't use a power bank that's cracked or starting to swell. Avoid using a power bank inside a bag as it can overheat.

What if my power bank is too high?

If your power bank is between 101 and 160 Wh, contact your airline well in advance and get confirmation in writing. Turn up without it and you risk losing the device at security check. In the last few months, many airlines have added

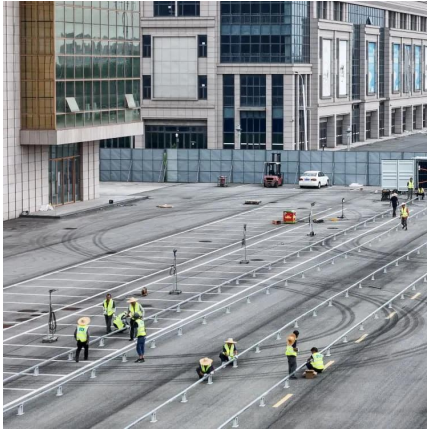

new power bank and battery rules.

Are power banks allowed in checked luggage?

The good news is that the important points are pretty straightforward. You must keep power banks in your carry-on cabin bag. They are not allowed in checked luggage under any circumstances. If your bag is gate-checked, make sure to remove any power banks or spare batteries first. Up to 100 Wh is generally fine without approval.
