

China Communications 5G base station share

Overview

How many 5G base stations are there in China?

Xie Cun, director of the information and communication development department at the ministry, said that Chinese operators have already deployed more than 1.15 million 5G base stations, accounting for more than 70% of the global total, and 5G network coverage has been achieved in urban areas of all prefecture-level cities.

Where did China build a 5G signal base in 2021?

In April 2021, according to the Chinese military's official website, at an elevation of 5,374 meters, China had built a 5G signal base at the Ganbala radar station in Tibet's remote Himalayan region, which is the world's highest manually operated radar station.

Who are 5G base stations suppliers?

Suppliers of 5G base stations were benefited from the rapid development of 5G technology. Huawei, Ericsson, Nokia, ZTE, and Samsung are among the world's leading suppliers. In 2024, these five vendors control almost 96.12 % of the global market. China has installed around 12 times as many 5G base stations as the United States.

Who makes 5G in China?

A paid subscription is required for full access. As of 2023, 58 percent of all 5G base stations in China had been manufactured by Huawei. Its closest competitor was ZTE with a market share of 31 percent. Both telecom manufacturers have maintained a similar market share throughout all bidding rounds since 2020.

Which 5G base station segment has the biggest market share in 2024?

In 2024, the segment with more than 25 GHz had the biggest market share, followed by the segment with 8GHz to 25GHz. More spectrum is needed to

deliver a consistent 5G grade service over the long term, which is boosting demand for the 8GHZ to 25GHZ frequency band. Asia Pacific dominated the global 5G base station market in 2024.

How big is the 5G base station market?

5G Base Station Market size was valued at USD 11.20 Billion in 2021 and is projected to reach USD 194.26 Billion by 2030, growing at a CAGR of 37.3% from 2022 to 2030. Because of the increased need for high-speed data with low latency, the 5G base station market is likely to develop significantly throughout the forecast period.
