

China-Europe outdoor wind power base station manufacturers ranking

Overview

Who is the best wind turbine supplier outside China?

Wood Mackenzie's report slightly swaps third and fourth place. Vestas, which held the third spot until 2023, has slipped to fifth place. However, the Danish multinational remains the leading wind turbine provider outside China, with 10.2 GW installed. Siemens Gamesa stands out from eighth place as the top offshore wind turbine supplier.

Who are Europe's top wind turbine suppliers?

Vestas, Siemens Gamesa, Nordex Group, GE Vernova and Enercon remain the top five turbine suppliers in Europe, in 2023. Chinese OEMs only installed 194.1 MW of wind turbines in Europe last year, of which only 8.4 MW was in the EU27.

Who makes the best offshore wind turbines?

In offshore wind, Siemens Gamesa reclaimed its title as the top turbine supplier, surpassing Vestas and its Chinese peers for the first time since 2020. The Europe-based manufacturer provided machines for almost three-quarters of offshore wind farms outside of mainland China last year.

How many wind turbines are installed in China?

Chinese OEMs only installed 194.1 MW of wind turbines in Europe last year, of which only 8.4 MW was in the EU27. Of the top 3 western OEMs, Vestas and Siemens Gamesa reported 155 MW and 3 MW installations in China in 2023, respectively, together accounting for only 0.2 per cent of the new installations in the world's largest wind market.

How many offshore wind companies are there in China?

BNEF tracked seven companies in mainland China with significant offshore wind additions, with no single dominant player. London and New York, March 17, 2025 – Wind turbine installations hit a record for a second year in 2024,

driven by rapid growth in mainland China, according to a new report by research provider BloombergNEF (BNEF).

Which OEM has the most wind power?

Vestas Wind Systems A/S (CPH:VWS) was the only western OEM in the top five, ranking third with 11.5 GW connected. Envision secured the second place with 14.1 GW, while Windey and MingYang were at fourth and fifth positions with 10.1 GW and 9.9 GW, respectively.
