

Construction of new energy storage project in Angola

Overview

The Board of Directors of the Export-Import Bank of the United States (EXIM) has approved an unprecedented \$1.6 billion direct loan to support the construction of 65 solar mini-grids equipped with energy storage facilities in Angola. Will Angola's new solar infrastructure provide sustainable electricity to 1 million people?

The new solar infrastructure will provide sustainable electricity to 1 million people. Angola's Ministry of Finance has secured €1.29 billion from Standard Chartered to finance the construction of 48 hybrid PV systems across the Angolan provinces of Moxico, Lunda Norte, Lunda Sul, Bie, and Malanje.

How much solar power does Angola have?

According to the latest statistics from the International Renewable Energy Agency (IRENA), Angola had 297 MW of installed PV capacity at the end of 2022. By 2025, the African nation aims to reach an access rate of 65% and a total installed capacity of approximately 10 GW.

What is Azule energy doing in Angola?

Azule Energy – a joint venture between global energy majors Eni and bp – is advancing exploration in Angola's offshore basins. In 2024, the company plans to take FID for Block 31, where Azule will develop three reservoirs using a FPSO unit.

Will Angola start producing oil in 2024?

While billion-dollar gas projects progress, developments across the renewable, power and infrastructure sectors have also advanced, with several anticipating a 2024 start. The first phase of Angola's Cabinda Refinery, an integrated modular oil refining platform, will start production in 2024.

What is Angola's Green Hydrogen Project?

Angola's landmark green hydrogen project will begin producing and exporting

green hydrogen to Germany in 2024, making the project the first of its kind in Africa to supply Europe with the resource. Powered by hydroelectricity, the 400 MW project is being developed by national oil company Sonangol alongside German firms Gauff and Conjuncta.

How much oil does Angola produce a day?

Representing one of the leading producers in Africa, Angola's oil production is expected to remain steady at approximately 1.1 million barrels per day in 2024. While billion-dollar gas projects progress, developments across the renewable, power and infrastructure sectors have also advanced, with several anticipating a 2024 start. Cabinda Refinery
