

Construction of supporting projects for East Asian energy storage industry

Overview

Will the next US administration reinvigorate Southeast Asia's energy transition plans?

With elections in November and President Joe Biden declining to run for another term, the next U.S. administration has an opportunity to reinvigorate and double down on the United States' critical role in Southeast Asia's energy transition plans.

Which countries are preparing for energy storage deployment?

Market dynamics, technical developments and regulatory policies that could be decisive for energy storage deployment in Australia, Mainland China, Malaysia, Singapore, South Korea, Taiwan, Thailand and Vietnam. This white paper explores the opportunities, challenges and business cases.

Which company is developing a second large-scale battery storage project?

The power generation arm of Manila Electric Company (Meralco) is developing its second large-scale battery storage project. Contemporary Amperex Technology Ltd (CATL) has signed a framework supply agreement for a project to export renewable energy from Indonesia to Singapore.

What are the challenges facing southeast Asia?

Across Southeast Asia, governments face a gap between aspirations and reality. They must contend with growing demand that will require major investments not only in mature renewables but also in unproven emerging technologies including small modular nuclear reactors (SMRs) and carbon capture, utilization, and storage (CCUS).
