

Construction of wind power plants at communication base stations has been suspended

Overview

Which offshore wind projects are under construction?

Under construction One offshore wind project is currently under construction, and another is awaiting commercial operation. Both projects are expected to begin operation in 2024. The 130-MW South Fork Wind project is awaiting commercial operation. It consists of 12 turbines located off the coast of Long Island, New York.

What does a federal pause order mean for offshore wind projects?

The order also directed all federal agencies to pause all “new or renewed approvals, rights of way, permits, leases, or loans for onshore or offshore wind projects” until the secretary of the Interior completes a “comprehensive” review of the federal “leasing and permitting practices.”.

Should offshore wind energy projects be prevented from moving forward?

“Preventing a permitted and financed energy project from moving forward sends a loud and clear message to all businesses, beyond those in the offshore wind industry, that their investment in the U.S. is not safe,” said Liz Burdock, president and CEO of Oceantic.

Is this the next level offshore wind aggression?

"This really is next level offshore wind aggression," Freudenberg says. The offshore wind project, called Empire Wind 1, was supposed to supply power to 500,000 homes in New York. The federal lease for the project was signed during the first Trump administration in 2017.

How much power does President Biden have to stop wind projects?

It's unclear how much authority he has to stop wind projects, particularly those that have their federal permits. His order will likely be challenged in court, much like an executive order President Joe Biden signed soon after taking office in 2021 that suspended new oil and gas lease sales was

challenged.

Can cylinders support offshore wind turbines?

Two projects have started building foundations to support offshore wind turbines. This past spring, developers Orsted and Eversource started building the vertical cylinders known as monopiles to support wind turbines at the 704-MW Revolution Wind project located offshore of Rhode Island.
