EU Emergency Communication Base Station EMS Equipment Prices

Overview

What are emergency communications?

Emergency communications Emergency communications are defined primarily as means communication by means of interpersonal communications services between an end-user and the PSAP with the goal to request and receive emergency relief from emergency services.

What is the European emergency number '112'?

Directive (EU) 2019/882 in addition entail the availability of real time text and total conversation for emergency communication by using the European emergency number '112'.

Why do we need emergency communications?

Emergency communications should ensure effective access to emergency services for all, including end-users living with disabilities and roaming customers.

Are electronic communications networks a future proof solution for emergency communications?

The lack of commonly agreed standards in support of electronic communications networks for emergency communications in Europe is a barrier to implementing future proof solutions which meet the requirements of the European Accessibility Act (EAA - Directive (EU) 2019/882) and the requirements of Article 109 of the EECC.

How many emergency calling applications are there in Europe?

There are presently hundreds of emergency calling applications in use across Europe, but their use is constrained to the boundaries of the Public Safety Answering Point (PSAP) with which they are integrated. The resulting TS, updated in March 2020, makes it possible for data to arrive at the most appropriate PSAP, wherever the call is made.
