

# **Energy Storage Microgrid Industry Price Trends**

## Overview

---

The microgrid market was valued at USD 11.4 billion in 2021 and grew at a CAGR of approximately 26% through 2024, driven by growing advancements in smart grid technology, energy management soft.

How big is the global microgrid market?

The market size was USD 22.9 billion in 2024, with a CAGR of 19.2% expected through 2034 on account of increasing energy resilience and renewable energy adoption. What is the projected value of the global microgrid market by 2034?

.

How much is the microgrid market worth in 2021?

The microgrid market was valued at USD 11.4 billion in 2021 and grew at a CAGR of approximately 26% through 2024, driven by growing advancements in smart grid technology, energy management software and energy storage systems aimed at improving microgrid scalability and efficiency.

Why does Schneider Electric hold a significant share in the microgrid market?

In the microgrid market, Schneider Electric holds a significant share due to its significant investments in R&D to improve microgrid technologies, with a key focus on enhancing energy storage systems, smart grid technologies and the integration of various renewable energy sources.

How big is the microgrid market in 2024?

By power rating, the 1–5 MW segment commanded 43% of the microgrid market size in 2024; 5–10 MW systems are advancing at a 20% CAGR between 2025 and 2030. By end-user, commercial and industrial sites captured 43% microgrid market share in 2024, while utilities represent the fastest-growing group at 21% CAGR.

Why is the China microgrid market important?

The China microgrid market holds the largest market share in the region on account of rapid economic growth, industrialization and urbanization. This drives a surge in energy demand, leading to make microgrid a cost-effective and scalable solution to expand energy access across both remote and urban areas.

Which companies are leading the microgrid market?

Additionally, high solar potential of the region coupled with falling solar PV costs support clean energy integration. Top five players, including ABB, General Electric, Schneider Electric, S&C Electric Company and Siemens, account for nearly 40% of the microgrid market.
