

Energy-saving energy storage equipment in the Belgian factory

Overview

Will Giga storage build a battery energy storage system in Belgium?

Giga Storage has secured an irrevocable permit to construct a 600MW/2.4GWh battery energy storage system (BESS) in Belgium.

What is Europe's largest energy storage facility?

Continental Europe's largest energy storage facility recently launched in Belgium's Deux-Acren village, bringing 100 megawatt-hours (MWh) of lithium-ion battery storage capacity and up to 50 MW of power.

How is Equans contributing to Belgium's energy transition?

Equans is contributing to Belgium's energy transition by building one of the country's largest battery farms, with a capacity of 2 x 100 MW and 800 MWh of storage. Find out how Equans, in partnership with ENGIE, is playing a key role in transforming the former Vilvoorde gas power plant into a pillar of renewable energy.

What is Wärtsilä's energy storage project?

This project marks Wärtsilä's entrance into the Belgian energy storage market and will be one of the largest systems in the country. The order was booked to Wärtsilä order intake in October 2021.

What is Wärtsilä's new energy storage facility?

The facility will include Wärtsilä's GridSolv Quantum, a fully integrated, modular and compact energy storage system, as well as the GEMS Digital Energy Platform, Wärtsilä's sophisticated energy management system.

How will Wärtsilä optimise the energy storage system?

Wärtsilä will optimise the energy storage system with its Service+ GAP solution, which provides maintenance with performance guarantees. The

energy storage system is expected to become operational in Q4 2022. Learn more: Wärtsilä's Energy Storage and Optimisation Technology Media contact for more information on this release:
