

Energy storage container solar energy production will be discontinued in 2025

Overview

Will energy storage growth continue through 2025?

With developers continuing to add new capacity, including 9.2 GW of new lithium-ion battery storage capacity in 2024 through November 2024 and comparable levels of growth expected through the fourth quarter of 2024, energy storage investments and M&A activity are expected to continue this trajectory through 2025.

Will Panasonic discontinue its solar & battery storage business?

Panasonic will discontinue its solar and battery storage business, the company told its North American installation partners in a letter dated April 28. The letter, signed by Naoki Kamo, president of Panasonic Eco Systems North America, was shared in full by an installer on Reddit and partially published on the company's website.

Will energy storage grow in 2024?

The energy storage sector maintained its upward trajectory in 2024, with estimates indicating that global energy storage installations rose by more than 75%, measured by megawatt-hours (MWh), year-over-year in 2024 and are expected to go beyond the terawatt-hour mark before 2030.

How many GW of battery storage will be installed in 2025?

The pace of deployment is accelerating dramatically. In 2023 alone, global battery storage additions reached 42 GW—more than double the previous year's installations. Looking ahead, experts predict 80 GW of new additions in 2025, representing an eightfold increase from 2021 levels.

Does Panasonic still make solar cells?

We covered Panasonic's planned phase-out of solar production back in 2022 on the NRG Learning Center, when the company first announced it would stop manufacturing solar cells. Now, as of early 2025, Panasonic is formally

withdrawing from all solar and energy storage business activities globally. In this post, we'll explore:.

What happened to Panasonic solar panels in 2021?

Despite its strong technology, Panasonic gradually shifted from in-house manufacturing to OEM partnerships as cost competition, particularly from Chinese suppliers, squeezed margins and reshaped the global solar market. In 2021, the company officially exited the solar panel manufacturing business.
