

# **French containerized communication high voltage power generation**

## Overview

---

Who operates France's high and extra-high voltage transmission system?

RTE operates France's high and extra-high voltage transmission system, the biggest in Europe. We are the French transmission system operator, owner of the biggest transmission network in Europe. Optimizing operation of the French power system, second by second.

How many interconnections does the French grid have?

The French grid, which is the most extensive in Europe, features 37 interconnections with its neighbouring countries. As a neutral and independent industrial operator of the energy transition, RTE optimises and transforms its network to connect electricity production facilities and consumers, especially industrial consumers.

How will Aquind's new VSC technology affect the transmission network?

The AQUIND converter stations will leave no more than half of the footprint left by an equivalent conventional LCC converter station. Applying the new VSC technology will further enable AQUIND to offer ancillary services to the transmission networks by providing rapid voltage and frequency support during system disturbances.

Why is RTE reserving all of the French production capacity?

With this commitment, RTE is reserving almost all of the French production capacity still available until 2028, for the production of more than 1,700 km of cables. Securing these strategic supplies is essential for RTE to if we are to meet future requirements for developing and strengthening the electricity transmission network.

How has French law regulated electrical system development?

effective.LEGISLATORFor a long time, the law has regulated electrical system development. In 1946, new framework was introduced for gas and electricity

to contribute to reindustrialization. From the 2000s, in accordance with the 1996 European directives, French law opened up gas and electricity markets. The legislator can define

## French containerized communication high voltage power generation

---

### [RTE, France's Transmission System Operator](#)

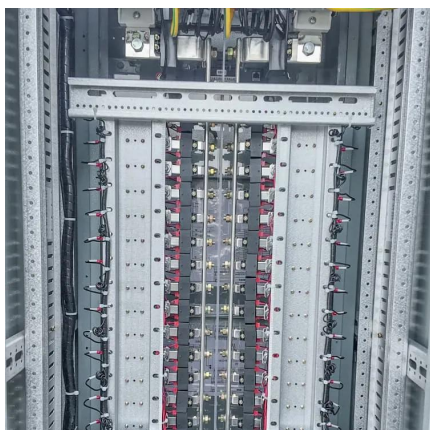

RTE, France's electricity transmission system operator, has a public service mission: to guarantee the supply of electricity at all times and ...

[Request Quote](#)

### **Container High Voltage Generator**

The container high voltage generators are designed for easy access and maintenance, making it easier for technicians to perform routine inspections, repairs, and servicing.

[Request Quote](#)

### **New Power-Line Communications Standard being Developed by ...**

The consortium partners will work to develop a next-generation chip that will power the millions of devices connected to the grid, allowing them to communicate with each other.
