

French new energy photovoltaic energy storage prices

Overview

As of early 2025, PV systems with a capacity of up to 9 kW now receive a feed-in tariff (FIT) of just €0.04/kWh. In stark contrast, the current retail electricity price in France stands at €0.2146/kWh – more than twice the current FIT. Why are French PV system owners using more solar power?

Lower payments for PV energy fed into the grid are pushing PV system owners in France to use more of their own solar power. The solar energy market in France is changing quickly. In 2024, the French government introduced significant cuts to feed-in tariffs (FITs) – the rates paid to PV system owners for feeding surplus electricity into the grid.

Does France have a storage battery market?

The European residential storage battery market has grown significantly during the energy crisis, but it has remained relatively small in France. Nevertheless, battery manufacturers expect higher demand due to rising electricity prices. From pv magazine France.

How many photovoltaic installations in France have a battery?

“In France, only five out of 100 photovoltaic installations are equipped with a battery,” said Maâty Bouanane, Enphase’s France sales manager, during an interview with pv magazine France in March, noting that in Germany, this rate is 80%.

How much does a PV system cost in France?

The trend has only intensified in 2025. As of early 2025, PV systems with a capacity of up to 9 kW now receive a feed-in tariff (FIT) of just €0.04/kWh. In stark contrast, the current retail electricity price in France stands at €0.2146/kWh – more than twice the current FIT.

How much solar energy will France produce a year?

The plant will produce around 64 GWh per year, equivalent to the annual

electricity consumption of 38,000 people. In February 2022, France government announced plans to have more than 100GW of installed solar PV capacity by 2050. This is expected to drive the solar energy market in the country.

How much does electricity cost in France?

“In France, electricity prices, which are around €0.20/kWh, remain lower than the levels observed in other European countries,” Arthur Jouannic, France director for LCP Delta, told pv magazine France.
