

Georgia transformer cabinet energy storage equipment

Overview

Does Georgia transformer make large power transformers?

The plant makes both Large Power Transformers (LPT) as well as Medium Power Transformers (MPT). Since acquiring the Rincon facility in January 2015, Georgia Transformer has been focused on strengthening the business and operations while keeping the foundations established by Efacec intact.

Where are Georgia Power transformers made?

The Georgia Power Transformer manufacturing facility, an affiliate of Virginia Transformer Corp, is located in Rincon, Georgia. It was built in 2009 by Efacec Energia. It uses the best engineering and design concepts available for shell transformers up to 1,400 MVA & 500 kV, core form up to 400 MVA & 525 kV, with a total capacity of 47,000 MVA.

What size transformer cabinets does Hoffman offer?

Find current transformer cabinets by Hoffman from sizes 18" to 48" high, three latch options, single and double doors for both indoor and outdoor applications.

What is a current transformer cabinet?

Current transformer (CT) cabinets house current transformers that are used to convert a primary current into a secondary current, usually reducing a large current into a smaller current for measurement and protection.

Is Rincon a Certified Power Transformer Company?

The plant is ISO 9001:2015 certified. We implemented VTC company policies and technology into our Rincon facility and further expanded our training program, leading us to develop the finest workforce in the power transformer industry. We are a leader in supplying reliable power transformers.
