

German photovoltaic energy storage company

Overview

Are solar photovoltaic modules safe in Germany?

In Germany, solar photovoltaic modules are certified according to European Norm (EN) standards. Manufacturers must comply with the "safety class II" norms that certify the electrical safety of photovoltaic modules.

How can a German company sell photovoltaic products in the European Union?

Innovative PV sales strategies, system configurations and integration processes - including storage and demand management - are intrinsic components of the specialist expertise being developed in Germany. International companies wishing to sell photovoltaic products in the European Union must fulfill established quality and safety requirements.

Is Germany a good place to invest in solar energy?

The photovoltaic industry is playing a key role in shaping Germany's sustainable energy future. Germany can look back on decades of solar energy experience and is considered as being a major photovoltaics pioneer. Germany is the biggest and fastest-growing rooftop solar PV market in Europe.

Is Sonnen the most innovative energy company in Germany?

The business magazine 'brand eins' and Statista placed sonnen among the most innovative energy companies in Germany. In the "Energy and Environment" category, sonnen was the only entrant to receive the highest rating among companies with 250 to 1,000 employees. How can we help you further?

.

Are rooftop PV systems paired with battery storage in Germany?

In 2019, 46% of all commissioned residential rooftop PV systems had already been paired with battery storage systems. Remarkably, this share surged to 77% in 2023, indicating a significant upward trajectory of the trend toward combining PV residential rooftop systems with battery storage in Germany.

How many photovoltaics are there in Germany?

As of the end of 2024, the total installed capacity of photovoltaics in Germany has exceeded 100GW, an increase of 21% compared to 2023. Among them, distributed roof systems account for up to 85%, and small-scale solutions such as balcony photovoltaics are rapidly becoming popular.
