

# **How much does Niue photovoltaic energy storage power cost**

## Overview

---

How much of Niue's diesel fuel is used for power generation?

Approximately 69% of diesel fuel imported into Niue is used for power generation – around 800,000 litres. Under the new energy roadmap, Niue has set a goal of 80% renewables by 2025.

Where is Niue located?

Niue, the largest upraised coral atoll in the world, is situated in the South Pacific Ocean, some 2,400 kilometres northeast of New Zealand. Like many island nations, Niue is heavily dependent on diesel fuel for power generation.

What is Niue's energy roadmap?

Under the new energy roadmap, Niue has set a goal of 80% renewables by 2025. According to Radio New Zealand, while the main focus of Niue's energy transition will be on solar power; the potential of other renewables such as wind power, biomass and wave energy will be investigated.

## How much does Niue photovoltaic energy storage power cost

---

### Niue Photovoltaic Power Storage Project Powering Sustainability ...

As island nations face rising fuel costs and climate threats, this 2.3 MW solar array with 4.8 MWh battery storage (operational since Q3 2023) reduces diesel consumption by 89% annually.
