

How to replace the power module of a base station

Overview

How do you replace a battery in a base station?

To replace batteries in a SimpliSafe base station, rotate the base counterclockwise (CCW) to remove it, then remove the batteries and replace them while ensuring the (-) and (+) orientation. When disposing of NiMH batteries, they should be recycled.

How do I connect to the base station?

To connect your Cellular Module to the Base Station, scroll to the network you'd like to connect to and press the right arrow to select it. Enter your network password. The Base Station will attempt to connect to the network and the Keypad will notify you of the result. If unsuccessful, you will be asked to verify your password by re-entering it.

Do I need to transfer my system to a new base station?

There may be a point where you need to transfer your system and service to a new or different Base Station. This could be due to replacing a faulty Base Station, moving to a new location, or upgrading your system, such as from Gen 2 to Gen 3 SimpliSafe.

What should I do if my Base Station is not connected to AC?

If you are seeing a "Power Outage" warning, you'll want to check if there is power at your location, and that the Base Station is properly connected to AC. But if you ever need to replace your Base Station's batteries, you can find a step-by-step guide [here](#).

What type of batteries does the base station use?

Your SimpliSafe Base Station is fitted with NiMH rechargeable batteries, which are constantly recharging as long as the Base Station is plugged in. The base station model is SSBS3.

How do I unlock the base station?

To unlock the base station and access the batteries, first remove the power cord to reveal a single screw. Unscrew it, and the bottom of the base station will turn freely and unlock. You should see 4AA batteries.
