

Industrial frequency inverter manufacturer

Overview

What are industrial inverters?

Industrial inverters are electrical power converters that change direct current (DC) to alternating current (AC). They are designed for industrial use to safeguard critical loads in places of high power shortage, such as high-rise buildings, offices, and industrial power plants. EnerTech delivers the finest industrial inverters that are efficient in saving energy bills even in the most extreme climatic conditions.

What is the Enertech industrial inverter?

The Enertech industrial inverter is a state-of-the-art design with high load handling capacity and high frequency. It is built to provide uninterrupted electricity even during a power loss and increases in capacity with the load.

What is a frequency converter?

A frequency converter can be single or three phases and also change voltage thus functioning as a power converter from 60Hz to 50Hz, from 50hz to 60hz, and from 50/60 Hz to 400 Hz and can be used for continuous duty or testing products designed for export. © 2025 Visicomm Industries. What are industrial-grade power inverters?

Industrial-grade power inverters feature high-power IGBT semiconductors and digital circuit design for enhanced life, more control, and trouble-free diagnostics.

What makes a good industrial power inverter?

All of our industrial power inverter products feature high-power IGBT semiconductors and digital circuit design for enhanced life, higher efficiency, and trouble-free diagnostics. Use of fiber-optic technology ensures faster signal processing, improved isolation and more accurate communications.

What is a PFC inverter?

A PFC (Power Factor Correction) inverter is an industrial inverter with a high current handling capacity and pure sine wave output. It is fitted with a single card-controlled system and an IGBT-based design. The PFC inverter saves 50% of the electricity and has an eight to ten hours battery backup.
