

Monaco s 10 billion energy storage project

Overview

What is a good example of sustainability in Monaco?

A standout example is the Mareterra eco-district, a landmark project that marries urban expansion with environmental ambition. From the successful transplantation of Posidonia seagrass to the installation of 5,000 square metres of photovoltaic panels, the district exemplifies Monaco's capacity for innovation in sustainability.

What does Monaco green energy do?

Monaco Green Energy supports governments in energy transition. We are working with a dozen countries ranging from Latin America to South East Asia, from India to the Middle East and Eastern Europe. We are in full expansion, which seems to underline that mentalities are changing in favour of solar energy.

Is Monaco a sustainable capital?

With the 20th anniversary of His Serene Highness Prince Albert II's reign approaching, the last two decades have reflected a clear vision; to position Monaco as a compact yet forward-looking capital. These projects offer not just buildings and roads, but a blueprint for sustainable progress.

What impact does state investment have on Monegasque economy?

One key insight is the economic ripple effect of state investment. Public infrastructure projects are largely contracted to Monegasque companies, ensuring that government spending directly supports the local economy.

Why should you start a company in Monaco?

Monaco has a position of international neutrality and doesn't scare anyone. Also, if you know how to use the right tools, and contact the right people who are already in that activity, such as Cerem, then creating a company in Monaco is quite simple. In addition, the market is so vast that there can be

duplication and there won't be competition.

How does Monegasque support the local economy?

Public infrastructure projects are largely contracted to Monegasque companies, ensuring that government spending directly supports the local economy. With around €800 million allocated to payment expenses for the current year alone, funded exclusively through the state budget, the principality bears significant financial responsibility.
