

Photovoltaic solar panels in Norwegian carports

Overview

What is a solar carport system?

Solar carport systems include a number of key components that require considerable electrical and mechanical design. Solar car parks range in size from a single carport arrangement for one parking space to large multi-bay car parks. We went through the basic of solar carports design in our previous article.

How many kW can a neosun solar carport generate?

NEOSUN solar carports can generate between 5 kW to 150 kW+, depending on the size, solar panel type, and local sunlight conditions. Our engineers optimize each system to maximize output for your specific location. Can the solar carport be customized?

Yes.

Why should you choose a solar carport?

Our solar carport solutions not only provide “green” energy for charging electric or hybrid cars but also for feeding in supplemental electricity into power circuits or to charge even entire company fleets. The semi-transparent solar modules made of high-performance solar cells ensure for an optimum solar yield on the surface available.

How long do neosun solar carports last?

NEOSUN solar carports typically offer a payback period of 1-5 years, depending on your energy usage, location, and government incentives. After that, you enjoy free solar energy and reduced operational costs. What maintenance is required?

Our carports are low-maintenance.

Are carport solar panels safe in snow?

With both ground mount and carport solar structures, higher snow loads usually require more and heavier structural supports for the PV modules. Ground mount structures pose fewer dangers to individuals as they are usually in fields and away from human activity.

Why should you choose A2 solar design carports?

a2-solar skillfully design every carport down to the finest detail in order to ensure for maximum green electricity yields and long-life performance as expected from a top German brand product. This is why our solar design carports are featured by:

Photovoltaic solar panels in Norwegian carports

Solar Carports , NewFrame , Solar Glass , Solar Panels , Solar ...

Our Y-frame carport design can support our innovative range of solar PV glass technologies to provide a waterproof and translucent roof to the carport. This includes our unique see-through ...
