

# **Polish battery energy storage system manufacturer**

## Overview

---

Does Poland have a potential for energy storage?

With the increasing share of renewables in the Polish power system, it is also necessary to escalate the potential for electricity storage. We at BayWa r.e. are globally active in developing and realising wind, solar, as well as energy storage projects.

Why is Poland a key player in the battery industry?

Poland has become a key player in the global battery industry, becoming the country with highest battery production in Europe. As the demand for lithium-ion batteries is getting higher over time, Poland has positioned itself as a major production hub for sustainable energy solutions in the world.

What are battery energy storage systems (BESS)?

Battery energy storage systems (BESS) enable more renewable energy to be fed into the grid. BESS can answer to demand peaks and thus have a dampening effect on energy prices on the electricity exchange as well as reducing the load on the grid.

Who is Bater battery?

Bater Battery is one of the top 10 battery manufacturers in Poland and of their most well-known battery brand. They built manufacturing plants in Gliwice and became battery suppliers for various industries. When their business started, they focused on traction and stationary batteries.

What kind of batteries does EnerSys make?

EnerSys manufactures and distributes various kinds of batteries, from reserve power and motive power batteries, even battery chargers and other accessories. Currently, their batteries are for uninterruptible power supplies, aerospace industry, and electric vehicles.

Why do we need battery energy storage systems?

Battery energy storage systems are one of them – and the missing piece that allows us to make the most out of clean energy sources. Battery storage technology is versatile and powerful. Large-scale stationary storage systems ensure sufficient renewable energies are always available at the right time.
