

# **Romanian photovoltaic panel custom manufacturer**

## Overview

---

Who is photovoltaic solar system integrator?

Photovoltaic solar system integrator, with offices in Bucharest, specialized in designing, manufacturing and assembling professional photovoltaic structures, is one of the largest suppliers of structure systems used for installation of photovoltaic panels produced in Romania for the local market and export. WHO WE ARE?

.

What are photovoltaic structures?

Photovoltaic structures represent the supports for photovoltaic panels. These photovoltaic panels can be with an aluminum frame with a thickness of between 30 mm and 45 mm, or photovoltaic panels with double glass without frames. Below are our structure systems available for ground-mounted power plants:.

What is the support system for photovoltaic panels?

supporting 2-pole photovoltaic panels system. This system is more stable and can be used in any area and on any type of land support system for photovoltaic panels with 1 sectional pole and 4 panels mounted in landscape format (horizontally). is for 3 photovoltaic panels placed in the landscape. All fixed to a 1-pole rotating metal structure (C210).

Which type of photovoltaic parking system best covers the ground?

structure system on land is one of the best system existing. This system best covers the ground because it does not need the shading area Carport type photovoltaic parking systems structure. Intended for the production of electricity using photovoltaic panels. with PV – Vertical installation.

What is the percentage of photovoltaic structures in a power plant?

Photovoltaic structures within a Photovoltaic Power Plant represent only a percentage of 7-10%. This percentage is very low, considering the extremely high importance of the structure. The supporting structures of the photovoltaic panels have one of the most important roles within a Photovoltaic Power Plant.
