

Russian communication base station EMS solution

Overview

How many base stations are there in Russia?

According to Vedomosti, by the end of November 2020, there are about 90 thousand base stations in the Russian capital, and with the launch of 5G networks, the number of such equipment will at least triple.

How many LTE base stations does MTS have in Russia?

MTS is putting 200 domestic LTE base stations into trial operation on its existing network in 37 regions of Russia. This is stated in the company's message. MTS will install and put into pilot commercial operation most of the 200 LTE 800 and LTE 1800 base stations by the end of the year.

Will Russian base stations speed up the development of Russian components?

Experts consider the mechanism timely, but emphasize that it will not speed up the development of Russian components. In early October 2022, it became known about the decision of the Government of the Russian Federation to support manufacturers of Russian base stations for 4G- and 5G networks .

Will Russian base stations be used in small settlements?

According to him, under these contracts, the Ministry of Digital Development will provide targeted financial support to manufacturers. Shadayev also explained that Russian base stations will be used initially in small settlements.

Will Russia introduce a ballroom system for localization of telecommunications equipment?

At the end of September 2022, it became known about the plans of the Ministry of Digital Development of the Russian Federation to introduce a ballroom system for assessing the localization of telecommunications equipment in order to include its unified register of radioelectronic products. [Read more here](#) .

When will Russian base stations be used?

Shadayev also explained that Russian base stations will be used initially in small settlements. Rostelecom President Mikhail Oseevsky, in turn, said that the first batches of Russian base stations are planned to be received in 2022.
