

Russian energy storage battery production company

Overview

Russian state atomic energy corporation Rosatom's integrator company for the energy storage business, Renera, which is a subsidiary of Rosatom's fuel arm TVEL, announced earlier this month that it will build its 3-gigawatt (GWh) lithium-ion battery manufacturing facility in the country's Kaliningrad region. Will Russian energy storage firm Renera invest in EV batteries?

June 23, 2023: Russian energy storage firm Renera says a special investment contract providing incentives and financial backing for domestic production of batteries for EVs and stationary storage systems was signed at the St Petersburg International Economic Forum on June 16.

Why is Russia a good place to buy a battery?

Russia is a country with a large number of battery manufacturers that play an important role in the global energy industry. From electric vehicle manufacturers to solar energy companies, these companies are constantly innovating to develop more efficient and environmentally friendly batteries.

Should Russia create an infrastructure for EV charging stations?

Russia must also "create an infrastructure for charging stations" for EVs, he said. Rosatom announced on November 23 that it had established a new subsidiary — Renera — dedicated to the manufacture of energy storage systems.
