

Slovakia uses lithium batteries to produce outdoor power supplies

Overview

Where is a new battery factory located in Slovakia?

The Slovakia project is located in the city of Suľany, with a construction period expected to be no more than three years and a total investment not exceeding 1.234 billion euros (approximately 9.421 billion yuan). The factory will cover an area of 65 hectares, with an initial battery capacity of 20 GWh and the potential to expand to 40 GWh.

How much electricity does Slovakia import?

4.1.3 4.1.3 Electricity imports reached 13,472 GW/h, with 13,079 GW/h exported. For the fifth consecutive year, the Slovakian electricity system has been dependent on imports, although this is mainly for commercial reasons rather than a lack of installed capacity.

How much money does the Slovakia project cost?

Specifically, the Slovakia project involves the construction of high-performance lithium batteries and supporting facilities with an annual capacity of 20 GWh, with a total investment not exceeding 1.234 billion euros (approximately 9.421 billion yuan).

How much will China invest in a lithium battery factory?

The company is expected to invest in the construction of lithium battery factories with an annual capacity of 20 GWh and related supporting projects in Slovakia and Morocco, with a total investment equivalent to approximately 19.1 billion yuan.
