

Somalia outdoor power supply specifications

Overview

Does Somalia have a power grid?

There is no national power grid. Diesel generators are the primary source of electricity. Most generators and distribution equipment are old and inefficient, resulting in a low-quality electricity supply. Regarding costs per kilowatt-hour of electricity, Somalia has one of the highest unit prices in Africa.

How much electricity does Somalia generate?

Private Somali companies generate approximately 128MW; most companies generate and distribute electricity independently. The Federal Government of Somalia has recently introduced electricity-related standards and regulations to improve safety and service delivery. A recently passed electricity bill (2023) has not yet been implemented.

Does Somalia have solar energy?

Solar Energy: Somalia has high renewable energy potential. Solar power could generate an excess of 2,000 kWh if the country reached its full capacity. Recently there has been progress in developing solar energy systems in the country by private sector electricity companies.

Does Somalia have wind power?

Wind Energy: Studies suggest Somalia has high potential for onshore wind power and could generate between 30,000 to 45,000 MW. A pre-conflict 1991 article in the scientific journal *Solar Energy* assessed that “the wind resource appears suitable for power production in 85 percent of the country.”.

What is the future of LPG in Somalia?

The LPG sector has high potential for growth and expansion in the country, including the development of onshore offloading bays, distribution logistics, retail, and franchising. **Solar Energy:** Somalia has high renewable energy potential. Solar power could generate an excess of 2,000 kWh if the country

reached its full capacity.

Which companies provide off-grid solar energy solutions in Somalia?

In addition, several other companies exist that provide off-grid solar energy solutions, including Blue Sky, Solargen, Delta, and others. Financing represents the biggest obstacle to Somalia realizing its potential as a hub for renewable energy. International development partners are providing support in the solar energy sector.
