

Sri Lanka Pumped Hydropower Storage Photovoltaic Power Station

Overview

The Maha Oya Pumped Storage Power Station is a 600 MW being developed in the Nuwara-Eliya and areas of . Upon completion, it will be the country's first facility, and one of the largest in terms of nameplate capacity. The Maha Oya facility is designed to store excess renewable energy from solar and wind sources, thus creating supporting infrastructure for Sri Lanka's target of generating 100% of its electricity from renewable sources by 2030.

Sri Lanka Pumped Hydropower Storage Photovoltaic Power Station

2 Energy storage. Sri Lanka plans to increase its use of renewable energy sources to 40% by 2030, First, pumped hydro storage is an efficient and established method for large-scale ...
