

Sri Lanka outdoor power supply processing

Overview

Electricity in Sri Lanka is generated using three primary sources — (which includes energy from biomass, coal, and fuel-oil), (including), and other sources (and): Hydroelectricity is the oldest and historically the principal source of electricity.

How is electricity generated in Sri Lanka?

Electricity in Sri Lanka is generated using three primary sources — thermal power (which includes energy from biomass, coal, and fuel-oil), hydro power (including small hydro), and other non-conventional renewable energy sources (solar power and wind power):.

When was wind power first used in Sri Lanka?

The ancient Sinhalese used the monsoon winds to power furnaces as early as 300 BC, making Sri Lanka one of the first countries in the world to use wind power. Evidence of this has been found in Anuradhapura and in other cities.

How much solar power does Sri Lanka have?

As of 2017, Sri Lanka has more than 100 MW in installed capacity for solar power and intends to be able to generate 1 GW installed capacity by 2025. Grid-connected solar power has only recently been introduced.

Does Sri Lanka have a hydroelectric project?

Although a large portion of the country's hydroelectric resources is tapped, the government continues to issue small hydro development permits to the private sector, for projects up to a total installed capacity of 10 MW per project. The two hydroelectric complexes of Sri Lanka.

What is the largest hydroelectric facility in Sri Lanka?

A panoramic view of the Victoria Dam and Reservoir, the largest hydroelectric facility in Sri Lanka.

When was electricity first used in Sri Lanka?

Sri Lanka (then Ceylon) first witnessed electricity in 1882 when SS Helios docked in Colombo for a local electricity exhibition. In 1890, using a diesel generator the first electric bulb in Ceylon was lit with electricity in the Billiard Room of Bristol Hotel in Colombo, before electric lights became an established commercial product.
