

Syria Communications 5G Base Station Construction 20 Years

Overview

How to improve telecommunications infrastructure in Syria?

Recently, the Syrian Minister of Communications and Information Technology, Hussein al-Masri, provided several measures to improve the telecommunications infrastructure in Syria. This includes issuing licenses for five internet service providers, with plans to grant 20 more within two weeks.

What is happening in Syria's telecommunications sector?

Residents in Syria are still awaiting the transitional government to take tangible steps towards remedying and reconstructing a devastated telecommunications sector.

Which regions have managed to preserve telecommunications infrastructure in Syria?

Some regions under the control of the Syrian government, such as the capital Damascus and the provinces of Homs and Hama, have managed to preserve their telecommunications infrastructure.

How has the telecommunications sector deteriorated in Syria?

Since the onset of 2011, Syria's telecommunications sector and internet networks have greatly deteriorated, especially in regions affected by military conflicts or foreign intervention. The post-war investment downturn resulted in a scarcity of resources necessary for modernizing the current network infrastructure.

How long does it take to get a telecommunications license in Syria?

Al-Masri noted that obtaining licenses took at least a year under the former Syrian government. Investment in the reconstruction and preparation of the telecommunications infrastructure is estimated to "up to 200 billion dollars," according to the minister.

Does Syria have a Communications & Informatics sector?

Although founded in 1989, the SCS did not provide services or input to the communications and informatics sector across Syria. A former employee at the Damascus Directorate of Communications, who requested anonymity, told SMEX about an incident during his time working there.
