

Telecommunication network cabinet embedded battery cabinet installation

Overview

What is an outdoor Telecom cabinet system?

The Outdoor Telecom Cabinet system includes rectifier modules, monitoring unit, power distribution units, battery packs, temperature control and other equipment, they are installed in an all in one outdoor cabinet. The all in one outdoor cabinet is divided into an equipment compartment, a battery compartment, and a wiring channel.

How to choose the power supply system of outdoor Telecom cabinet?

The power supply system of outdoor telecom cabinet is installed in the field environment, and the installation and maintenance conditions are complex. The feasibility and convenience of installation and maintenance operations, and the personal safety of operators should be considered in the design.

What is the difference between equipment cabinet and Battery Cabinet?

When there is only one cabinet, the equipment compartment is at the top, the battery compartment is at the bottom, and the cable passages are on both sides. When there is more than one cabinet, separate the equipment cabinet and the battery cabinet.

Can Telecom cabinets be welded automatically?

Outdoor Telecom cabinets are mostly welded, and manual welding is used for small batches. Robotic laser automatic welding can be used for large batches to improve efficiency and reduce deformation. At this time, the feasibility of automatic welding of parts structure should be considered.

How to cool outdoor Telecom cabinet system?

The enclosure protection level of the battery compartment is required to reach IP44. The cooling methods of the Outdoor Telecom Cabinet system include: natural cooling, fan cooling, heat exchanger cooling, and air conditioning cooling.

How can a telecom cabinet reduce OPEX?

A synthesis of experience in power supply, structure, protection, network, etc. is required. A good outdoor telecom cabinet system will greatly reduce OPEX. Edgeware's consistent philosophy is that CAPEX and OPEX are equally important, and try to reduce customers' OPEX as much as possible.
