

Turkey energy storage cabin price

Overview

Is Turkey establishing a market for large-scale energy storage?

The latest announcement is a big step towards establishing a market for large-scale energy storage in the country, Energy-Storage.news heard from Korkut Öztürkmen, board member at Aksa Energy, one of Turkey's largest independent power producers (IPPs).

Is Türkiye a regulated electricity market?

Türkiye has a semi-liberalized and moderately regulated market. Energy Exchange Istanbul (EXIST) is Türkiye's electricity spot market, which manages day-ahead and intraday markets where 40% of electricity is traded among 854 market participants. EXIST's website features electricity prices in real time.

Should energy companies be allowed to invest in energy storage?

The pre-licensing comes after key regulatory changes including an EMRA ruling in 2021 that energy companies should be allowed to invest in energy storage. Last year, energy laws were adapted to allow power producers to develop new renewables projects on the congested Turkish grid, if paired with energy storage.
