

# **Türkiye s large energy storage vehicle**

## Overview

---

Rolls-Royce has been awarded a contract by Polat Enerji, one of Türkiye's leading investors in the renewable energy sector, to supply a large-scale battery energy storage system with a capacity of 132 megawatt-hours (MWh). How big is Türkiye's energy storage capacity?

Türkiye's 35 GWh storage capacity accounts for grid-scale projects alone. Global energy storage investments have surpassed 150 GWh. Türkiye has already begun installations in Hungary, Bulgaria, and Spain, leveraging its geographic advantage close to Europe.

Is Polat Energy Turkey's largest battery energy storage system?

Once commissioned, the facility will be Turkey's largest battery energy storage system. Polat Energy is an established renewables developer in Turkey, owning approximately 6% of the country's installed wind energy capacity with a cumulative power output of around 660 MW.

Why is Rolls-Royce supplying a large-scale battery energy storage system?

Later, the storage units also supply green electricity to the grid when there is no wind but energy is still needed. Rolls-Royce has been awarded a contract by Polat Enerji, one of Turkey's leading investors in the renewable energy sector, to supply a large-scale battery energy storage system with a capacity of 132 MWh.

Where does Türkiye invest in energy storage?

Global energy storage investments have surpassed 150 GWh. Türkiye has already begun installations in Hungary, Bulgaria, and Spain, leveraging its geographic advantage close to Europe. Tokcan highlighted the importance of local expertise in manufacturing, system management, and maintenance to avoid dependency on foreign firms.

Can Türkiye become a regional hub for battery technology?

“We believe Türkiye can become a regional hub for battery technology, and our government is committed to making this a reality,” Tokcan said. These efforts will position Türkiye as a leader in energy storage innovation, fostering collaboration and supporting renewable energy goals.
