

UK Advanced Energy Storage Project

Overview

Thorpe Marsh is the largest standalone BESS project financed globally and the largest BESS financing in Europe. The 1,400 MW / 3,100MWh project, which is expected to be operational starting in mid-2027, will be the largest battery storage facility in the UK and among the largest in Europe. What are the largest energy storage projects in the UK?

Listed below are the five largest energy storage projects by capacity in the UK, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a complete picture of the global energy storage segment. Buy the latest energy storage projects profiles here. 1. Sunnica Solar-plus-Battery Energy Storage System.

What is the biggest battery storage project in the UK?

The 1,400MW (3,100MWh) project will be the largest battery storage project in the UK, and one of the largest in Europe. The project was approved by Doncaster Council on 28 January 2025 and will help strengthen the local economy by creating jobs during the construction and operation of the facility.

Which UK battery energy storage systems reach energisation?

In this week's Charging Forward, Gore Street, Eku and BW ESS reach energisation at UK battery energy storage system (BESS) projects, amid warnings over an oversubscribed grid connection queue. UK energy storage developer Root-Power has secured planning consent for a 40 MW/80 MWh BESS project in Brinsworth, Rotherham.

Could a new energy storage scheme help the UK achieve energy independence?

The UK is a step closer to energy independence as the government launches a new scheme to help build energy storage infrastructure. This could see the first significant long duration electricity storage (LDES) facilities in nearly 4 decades, helping to create back up renewable power and bolster the UK's

energy security.

Could long duration electricity storage be the UK's first energy storage facility?

This could see the first significant long duration electricity storage (LDES) facilities in nearly 4 decades, helping to create back up renewable power and bolster the UK's energy security. These technologies work like giant batteries by storing renewable energy and releasing it onto the grid and into homes when needed.

What is the long duration energy storage Investment Support Scheme?

Long Duration Electricity Storage investment support scheme will boost investor confidence and unlock billions in funding for vital projects. The UK is a step closer to energy independence as the government launches a new scheme to help build energy storage infrastructure.
