

Western Brazil Energy Storage Project

Overview

What is the market potential for energy storage in Brazil?

Daniel Lyrio: TBEA considers that Brazil's market potential is estimated at 5 GWh for the next three years, considering that we have the auction in 2025, with an average market [battery project] value of BRL 1.5 million/kWh, the number to be invested is around BRL 7.5 billion. Which applications should lead the adoption of energy storage in Brazil?

.

Will Brazil conduct the first energy storage auction?

Brazil is set to conduct the country's first-ever energy storage auction for adding batteries and storage systems to the national power grid.

Will Brazil install a battery energy storage system in 2024?

A study by Brazilian consultancy Greener has indicated that the country installed 269 MWh of energy storage capacity in 2024, growth of 29% from 2023. Demand for battery energy storage system (BESS) components grew 89% in Brazil from 2023 to 2024 and most of the resulting systems are likely to be installed in 2025.

Is there a Bess project in Brazil?

Image: A BESS project in Brazil from ISA CTEEP. The Brazilian Minister of Energy and Mining has unveiled an auction for battery energy storage projects to be held in 2025.

What is driving Brazilian energy storage demand?

An unreliable grid is driving Brazilian energy storage demand. The world is set to have more than 760 GWh of energy storage capacity by 2030, led by Chinese and United States markets dominated by utility-scale systems.

Can TBEA replicate the energy storage model in Brazil?

TBEA will bring case studies from large energy storage projects installed by the company around the world, showing the potential to replicate the model in Brazil. pv magazine will also look at the variables that can make these projects more, or less competitive. Register now! From pv magazine Brasil.
