

# **Western Europe purchases new photovoltaic panel manufacturers**

## Overview

---

Where do solar panels come from in Europe?

However, the bulk of the demand for solar modules in Europe is covered by imports. Currently, 97% of the solar panels imported into the EU come from China. The charter sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.

Are solar panels made in Europe certified?

All solar panels made in Europe are required to carry this certification. This certification, developed by the International Electrotechnical Commission (IEC), specifies test procedures to assess the performance of crystalline silicon terrestrial photovoltaic (PV) modules under natural sunlight.

Does Spain have a solar panel supply chain?

Spain is now home to a thriving solar panel supply chain, contributing to a greener future for the country and Europe at large. Europe is home to a large number of world-class solar panel manufacturers.

How many solar panel manufacturers are there in Europe?

Europe is home to a large number of world-class solar panel manufacturers. In the following section, we provide an overview of 59 leading manufacturers, all of which are contributing significantly to Europe's renewable energy landscape.

Why are European solar panels so popular?

The European market is renowned for its stringent certifications, which uphold the quality and safety standards of solar panels in the region. These certifications are paramount in ensuring the performance, reliability, and safety of solar products.

Should European project developers consider sourcing from domestic solar

panels?

Such initiatives might force some European project developers to consider sourcing from domestic solar panel manufacturers. Further help should come courtesy of the EU Net Zero Industry Act.
