

What are the best photovoltaic inverters

Overview

Which solar inverter is best?

CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025. It was the most efficient inverter we looked at, letting you use a larger percentage of the energy your solar panels generate. This translates to less and more power to use around the house.

What type of solar panel inverter do I Need?

The most common type of solar panel inverter used in solar panel installations is the string inverter.

What are the different types of solar inverters?

When it comes to home solar installation, homeowners have three types of solar inverters to consider: string inverters, string inverters with DC power optimizers and microinverters. Each inverter setup comes with upsides and downsides. Here's what you should know.

How do I choose the right solar inverter type?

There are two categories to consider when deciding on the right solar inverter type: the solar inverter technology, and the type of solar power system the inverter is for. String inverter: A string inverter is a single, standalone unit that converts power from a whole string (or strings) of solar panels.

Do you need a solar inverter?

Solar inverters are a necessary but often forgotten part of a home solar panel system since they convert sunlight into usable electricity for your home appliances. Without a solar inverter, you wouldn't be able to use those solar panels to power your home.

Where can I buy a solar inverter?

In the United States, there are several reputable places where customers purchase solar panel inverters for their solar panels, including The Home Depot, SolarEdge, and A1SolarStore. The Home Depot offers a range of solar inverters suitable for various applications such as cabins, RVs, backup power, and residential use.
