

What equipment does the Tonga communication base station EMS have

Overview

What are the communications systems in Tonga?

This article is about communications systems in Tonga . Main Island has 4G mobile. Broadcast stations: AM 1 (2005), FM 5 (2005), shortwave 1 (1998).

When did Tongasat start telecommunication?

In April 2002 the Tongasat company started its own satellite telecommunication service when it obtained the Esiafi 1 (former private American Comstar D4) satellite (launched in 1981) that was moved to Tonga's own geostationary point. Broadband internet communication is provided by the Tonga Cable System that went online in April 2018.

Does Tonga have Internet?

Broadband internet communication is provided by the Tonga Cable System that went online in April 2018. On 15 January 2022, following a volcanic eruption on the island of Hunga Tonga-Hunga Ha'apai, the Tonga Cable System was severed, leaving the country without Internet access.

How does an EMS system work?

In some EMS systems, simple standard communications are transmitted by pushing a button on a mobile data terminal (MDT) mounted in the ambulance. Carry portable radio whenever you leave unit. Report must be given to destination hospital so it can prepare for arrival.

How do you communicate with an EMS technician?

Give assessment information about your patient, but avoid offering a field diagnosis of the patient's problem. For example, say, "Patient complains of abdominal pain" rather than "Patient probably has appendicitis." Avoid slang or abbreviations that are not authorized. Use EMS frequencies for only authorized EMS communication.

What is emergency medical communication?

Emergency medical communication comes in many forms and is essential to team-based patient care. • The medical radio report is structured to present pertinent facts about the patient without providing more detail than necessary. Interpersonal communication is often challenging in EMS.
