

# What is Israel s 5G base station

## Overview

---

What is 5G & how does it work in Israel?

The fifth generation of cellular networks, 5G, officially launched in Israel on Tuesday. It offers customers faster browsing speeds on their smartphones – if they can connect to it. Following some setbacks over tenders and upgrades, the network officially launched across the country.

How many 5G sites are there in Israel?

The first offers 500 gigabytes of Internet surfing for NIS 60 per month for five years. The second offers a terabyte (1,000 GB) for NIS 70 per month for five years. Together, the providers say they have installed 250 5G sites throughout Israel, with more being added regularly.

How many Israeli companies are working on 5G?

There are currently over 25 Israeli companies working on 5G related tech, from giants like Intel to small early-stage startups. One of the veterans of the industry in Israel is Zion Hadad, who now heads startup RunEL NGMT.

What does 5G mean for Tel Aviv?

The opinions expressed in this text are solely that of the author/s and do not necessarily reflect the views of the Heinrich Böll Stiftung Tel Aviv and/or its partners. The fifth-generation cellular network technology, 5G, is about to accelerate the overall pace of our daily lives and become a key part of our critical digital infrastructure.

How many GB is a terabyte of 5G in Israel?

The second offers a terabyte (1,000 GB) for NIS 70 per month for five years. Together, the providers say they have installed 250 5G sites throughout Israel, with more being added regularly. Pelephone offers 200 GB of Internet surfing for NIS 50 per month or 500 GB for NIS 60 a month.

When did 5G start?

The first 5G networks were launched in 2019.[i] However, the overall trajectory of cellular networks goes back more than 40 years. Simply put, 5G is the 'fifth generation' of wireless network technology (or mobile communications). The evolution started with 1G in the late 1970s and during the 1980s.
