

# **What is the price of inverter in West Africa**

## Overview

---

The price of solar inverters vary depending on the brand, type, and specifications, but they typically range from around R2,000 to over R80,000. However, it is important to note that the cost of the inverter is only one aspect to consider when installing a solar system. How much does an inverter cost in South Africa?

Here's a breakdown of common inverter categories and their average price ranges in South Africa as of mid-2025: Here are some of the most popular inverter products on the market right now, along with their approximate prices: Mecer 1200VA Inverter Trolley – R9,899 Great for basic backup; comes with a built-in battery and wheels.

What types of solar inverters are available in South Africa?

In South Africa, there are four primary types of solar inverters available: string inverters, microinverters, power optimizers, and hybrid inverters, some with charge controllers and some without a charge controller. Each type offers specific advantages and disadvantages and is suitable for different solar installations.

How do solar inverters work in South Africa?

Solar inverters in South Africa are responsible for continually tracking your solar array's voltage to figure out the maximum power at which your solar panels operate, ensuring the system produces the most and cleanest power at all times. There are many different sizes available for inverters.

Which solar inverter is most expensive?

String inverters are often the most affordable, while hybrid solar inverters tend to be more expensive, but provide greater flexibility and efficiency. Location also plays a significant role in determining the cost of inverters. For instance, inverter prices in South Africa may differ from those in other countries.

How much does a microinverter cost?

Price Range: R8,000 – R30,000 Advantages: Disadvantages: Microinverters are small inverters installed on each solar panel. They convert DC to AC at the panel level, improving the system's overall efficiency, particularly in cases where shading or different panel orientations are involved. Price Range: R10,000 – R35,000 Advantages: Disadvantages:.

How much does a string inverter cost?

String inverters are a common choice for residential and commercial solar installations. They are called “string” inverters because they connect a series (or string) of solar panels. The total output from these panels is then converted from DC to AC by the inverter. Price Range: R8,000 – R30,000 Advantages: Disadvantages:
