

Which lithium energy storage power supply is best in Ukraine

Overview

Why is DTEK launching a battery storage facility in Ukraine?

REUTERS/Valentyn Ogirenko/File photo Purchase Licensing Rights KYIV, Sept 11 (Reuters) - Ukrainian private energy firm DTEK has launched the country's largest battery storage facility to ensure stable power supplies in the face of Russian attacks on Ukraine's energy sector, the company said on Thursday.

How important are energy storage systems in Ukraine?

"In the context of large-scale attacks on Ukraine's energy system, the role of energy storage systems has become just as fundamental as energy generation itself," said energy minister Svitlana Grinchuk. (\$1 = 0.8554 euros).

What is the lithium resource potential in Ukraine?

Rare metals are an important component of Ukraine's resource base. According to preliminary estimates, the overall lithium resource potential in Ukraine is quite high. The main lithium deposits are associated with Proterozoic complexes (1,7-2,1 billion years) of alkaline rocks, carbonate and granite pegmatites.

Where is lithium found in Ukraine?

Significant lithium reserves have been discovered at the Shevchenkivske, Polokhivske, Stankuvatske deposits and Dobra, Kruta Balka promising areas. The estimation of lithium oxide reserves is close to 500,000 tons, but none of lithium deposits in Ukraine are not mining yet.
